

# THE MISSOURI BUDGET

## Fiscal Year 2023

### REVIEW OF FISCAL YEAR 2021 REVENUE

The COVID-19 pandemic, which began in the spring of 2020, continued to have a significant impact on Missouri's revenue collections. In Fiscal Year 2021, net general revenue collections grew by 25.8 percent over the previous year. The increase in net general revenue was primarily driven by the income tax return filing due date which was moved from April 15, 2020 to July 15, 2020, which resulted in Fiscal Year 2021 income tax receipts being collected in Fiscal Year 2021. Had the tax due dates in Fiscal Year 2020 not been delayed into Fiscal Year 2021, Fiscal Year 2021 net general revenue would have grown by 7.6 percent. Returning to more normal income tax due dates, Fiscal Year 2022 revenues are forecasted to decline by (0.5) percent. Fiscal Year 2023 revenues are forecasted to grow by 2.1 percent.

### THE ECONOMIC OUTLOOK

#### U.S. Economic Position

The national economy saw a dramatically steep, but short, recession during the second quarter of Calendar Year 2020. While national GDP has fully recovered from the record recession, supply constraints, employment constraints, inflation, and continued COVID concerns are still weighing on the national recovery.

The national unemployment rate hit a cyclical low of 3.5 percent prior to the start of the COVID-19 pandemic. At the height of the pandemic, the national unemployment rate reached 14.8 percent. By November 2021, the national unemployment rate had declined to 4.2 percent. Continued recovery is expected through 2022.

The housing sector has done remarkably well since the start of the pandemic. Single-family starts were up 1.1 percent in November 2021. However, average monthly growth from November 2020 through November 2021 was 21.0 percent. Housing prices have seen remarkable growth during 2021. Housing prices appear to be slowly moderating from their peak in July 2021; however, growth is still up 18.9 percent for the year. The inventory of homes was back up to a six and a half month supply as of November 2021, after reaching a low of three and a half months supply in late 2020.

Personal income growth received a strong boost from the federal stimulus passed in multiple federal aid packages throughout 2020 and 2021. Consumer confidence has been volatile as inflation and COVID-19 concerns weigh on consumers. Consumer spending has been extremely strong through 2021 boosted by federal stimulus payments and strong wage growth. Both personal income and consumer spending are expected to remain strong for the near future. Despite a volatile year, the stock market continued its record growth. Inflation is up 6.8 percent for the year as consumers spending increased wages and federal stimulus payments meet supply constraints.

## Economic Projections

Increase by Calendar Year			
	<u>2021</u>	<u>2022</u>	<u>2023</u>
<b><u>US</u></b>			
Real GDP	5.5%	4.4%	2.9%
Employment	2.8%	4.0%	1.7%
Personal Income	6.5%	1.0%	5.0%
Consumer Expenditures	10.0%	5.4%	3.3%
Consumer Prices	4.5%	3.8%	2.2%
<b><u>MO</u></b>			
Employment	2.0%	2.7%	0.9%
Personal Income	6.7%	0.1%	4.7%

The outlook over the next two years shows strong, but slowing growth. As the labor market continues to improve, wage growth is expected to remain strong. This will keep consumer spending from collapsing with the winding down of federal stimulus. Further, oil and energy prices are expected to moderate which will boost consumer and business confidence.

The Federal Reserve slashed interest rates at the beginning of 2020 in order to combat the pandemic-induced recession. The Federal Reserve began tapering assets in the fall of 2021. Once asset tapering is complete, expectations are that the Federal Reserve will begin raising interest rates in mid-2022 to combat high inflation. The Federal Reserve will need to move cautiously over the next year as supply and demand misalignment may plague the economy for the near future.

In addition, there are other risks to this outlook. Geopolitical conflicts in the Middle East could have a powerful impact on oil prices. Tensions in Asia and the British exit from the European Union could have strong impacts on world trade. However, economic growth could exceed expectations if COVID vaccines are distributed around the world quicker than

expected and supply bottlenecks ease faster than anticipated.

### Missouri Economic Position

Missouri's economy performed slightly better than the national economy since the start of the COVID-19 pandemic. Employment did not decline as much in Missouri and recovered faster. By November, employment had increased 1.4 percent for the year. The peak unemployment rate was 12.5 percent in April 2020. Through November 2021, the unemployment rate had declined to 3.5 percent. Continued improvement in employment is expected through 2022.

Personal income received a strong boost during 2021 from federal stimulus payments. Meanwhile wages and salaries have seen the strongest growth in more than two decades. Wages and salaries grew by 11.6 percent in second quarter of 2021 and by 9.3 percent in the third quarter of 2021. As the labor force continues to recover, strong wage growth is expected to continue.

Missouri's economy is expected to follow the national economy trend through 2023. While Missouri's economy was not hit as hard as the

national economy, Missouri's recovery will start to slow compared to forecasted national growth. Much over the next year will depend on inflation, supply constraints, and continued COVID case and variant trends.

## **REVENUE PROJECTIONS FOR FISCAL YEARS 2021 AND 2022**

Revenue forecasting is challenging under the best of circumstances but forecasting through the pandemic has been especially challenging. In addition to the typical forecasting uncertainty, the forecast for the next two years will be significantly impacted by potential federal legislation, inflation and the Federal Reserve's reactions, supply constraints that have proven to be less transitory than initially believed, and sudden shifts in consumer behavior as the pandemic continues.

Revenue growth for Fiscal Year 2022 is expected to remain strong as the economic recovery continues, but for the comparison issues that resulted from the delayed income tax payments received during Fiscal Year 2021. All major general revenue income categories are forecasted to have strong growth through Fiscal Year 2022, removing the delayed income tax from Fiscal Year 2021, resulting in an estimated 7.0 percent growth in net general revenue. However, because Fiscal Year 2021 received a significant amount of Fiscal Year 2020 income tax payments, Fiscal Year 2022 net general revenue is forecasted to decline by (0.5) percent.

The forecast for Fiscal Year 2023 reflects moderating revenue growth as the recovery transitions into a more typical business expansion cycle. Governor Parson's Fiscal Year 2023 budget is based on a forecasted growth of 2.1 percent compared to the revised Fiscal Year 2022 estimate.

## **REVENUE LIMITATION AMENDMENT**

Article X of the Missouri Constitution establishes a revenue and spending limit on state government. The limit is 5.6 percent of Missouri personal income, based on the relationship between personal income and total state revenues when the limit was established and approved by voters in November 1980. Calculations made pursuant to Article X of the Missouri Constitution show that total state revenues for Fiscal Year 2020 were below the total state revenue limit by \$6.1 billion.

The Office of Administration projects that total state revenues will not exceed the total state revenue limit in Fiscal Years 2022 or 2023. These preliminary calculations are subject to change as actual state revenue collections become known and as the federal government revises its estimates of Missouri personal income. These projections could change if legislation is approved to increase taxes without a vote of the people. Pursuant to Article X of the Missouri Constitution, revenue approved by the voters is not subject to the revenue and spending limit.

In addition, Article X, Section 18(e) of the Missouri Constitution states the General Assembly shall not increase taxes or fees in any fiscal year, without voter approval, that in total produce net new annual revenues greater than \$50 million, adjusted annually by the percentage change in the personal income of Missouri for the second previous year, or one percent of total state revenues for the second fiscal year prior to the General Assembly's action, whichever is less.

"Net new annual revenues" is defined as the net increase in annual revenues produced by the total of all tax or fee increases by the General Assembly in a fiscal year, less refunds and less all contemporaneously occurring tax or fee reductions in that same fiscal year.

For Fiscal Year 2021, the calculations are \$139.4 million for the personal income amount and \$111.8 million for the one percent of total state revenues amount. Legislative actions in the 2021 session resulted in a decrease of \$53.3 million in state revenues when the provisions are fully implemented.

For Fiscal Year 2022, the calculations are \$147.9 million for the personal income amount and \$104.6 million for the one percent of total state revenues amount.
